

HospiCart

User Manual

Databases 2025

Abril Maitena Betti, Lucía Fandiño and Marta Guzmán

Introduction

This document provides a comprehensive user manual for the three main roles using the HospiCart system: **Doctor**, **Nurse**, and **Supplier**. It explains how each user type interacts with the platform, how to perform essential operations, and how to navigate the system interfaces.

This manual includes:

- Overview of each user role
- Step-by-step usage guide
- Key functions available per user type

Doctor Manual

1.1 Overview

Doctors use the HospiCart system to browse available medical supplies and place orders for use in their clinical practice.

1.2 How to Use

1. **Log in** with your credentials.
2. The DoctorMenu interface will be displayed.
3. Use the following main functions:
 - **Browse Products:** View the catalog of available products.
 - **Search by Category or Name:** Filter items based on medical need.
 - **Add to Cart:** Select products and add them to your session-specific cart.
 - **View Cart:** See all items selected and modify quantities.
 - **Confirm Order:** Place an order, which is registered in the system.
 - **View Past Orders:** Access history for reordering or tracking.

1.3 Session Behavior

- The cart is unique per doctor and per session.
- Your personal data is linked to the Client object.
- You cannot access other users' orders or carts.

Nurse Manual

1.1 Overview

Nurses can also browse and order products. Their interface is similar to the doctor's but may have restricted permissions.

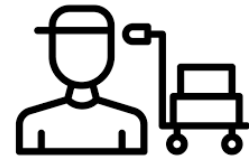

1.2 How to Use

1. **Log in** using your nurse credentials.
2. The NurseMenu interface will open.
3. Functionalities:
 - **Browse and Search Products.**
 - **Add Items to Cart.**
 - **Place Orders for Ward Supplies.**
 - **View Order History** (ward-based or personal).
 - **Update or Remove Items in Cart.**

1.3 Permissions

- Nurses do not have permissions for all products.

Supplier Manual

1.1 Overview

Suppliers manage inventory, register new products, and update availability via the SupplierMenu.

1.2 How to Use

1. **Login** with your supplier account.
2. The SupplierMenu interface is shown.
3. Main functionalities:
 - **Add New Products** to the catalog.
 - **Update Stock Quantities.**
 - **Modify Product Information.**
 - **View Orders that Involve Your Products.**
 - **Export Inventory Reports.**

1.3 Product Lifecycle

- Products are linked to the supplier and cannot exist in the system without an assigned supplier.
- Product availability updates in real-time.
